

Ministry opportunities in Orlando are multi-faceted and diverse, and our team will have an opportunity to interact in different service projects throughout the week. Our team will be helping invest in kids through after-school projects or other community outreach. We will be helping meet basic needs by working in food pantries and soup kitchens, helping others get access to the essentials they need. We will be part of community development projects, helping with landscaping and working in nurseries to brighten up the community. We will have opportunities to work directly with children's homes, nursing homes, and homeless shelters. We will usually be working with a morning and afternoon project.

## Daily Schedule
